INFORMATION FOR YOUR SAFETY!

THE FCC REGULATION WARNING (for USA)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Unauthorized changes or modification to this system can void the user's authority to operate this equipment.

CAUTION

The normal function of the product may be disturbed by Strong Electro Magnetic Interference. If so, simply reset the product to resume normal operation by following the owner's manual. In case the function could not resume, please use the product in other location.

PRECAUTIONS

PLEASE READ CAREFULLY BEFORE PROCEEDING

Please keep this manual in a safe place for future reference.

Power Supply

Please connect the designated AC adaptor to an AC outlet of the correct voltage.

Do not connect it to an AC outlet of voltage other than that for which your instrument is intended.

Unplug the AC power adaptor when not using the instrument, or during electrical storms.

Connections

Before connecting the instrument to other devices, turn off the power to all units. This will help prevent malfunction and / or damage to other devices.

Location

Do not expose the instrument to the following conditions to avoid deformation, discoloration, or more serious damage:

- Direct sunlight
- Extreme temperature or humidity
- Excessive dusty or dirty location
- Strong vibrations or shocks
- · Close to magnetic fields

Interference with other electrical devices

Radios and televisions placed nearby may experience reception interference. Operate this unit at a suitable distance from radios and televisions.

Cleaning

Clean only with a soft, dry cloth.

Do not use paint thinners, solvents, cleaning fluids, or chemical-impregnated wiping cloths.

Handling

Do not apply excessive force to the switches or controls.

Do not let paper, metallic, or other objects into the instrument. If this happens, unplug the AC adaptor from the wall outlet. Then have the instrument inspected by qualified service personnel.

Disconnect all cables before moving the instrument.

Setup

This section contains information about setting up your instrument and preparing to play. Please go through this section carefully before turning the power on.

Power Supply

You can power the instrument either by batteries or by power adaptor. Before you switch your instrument on, turn down the volume of instrument and the connected audio equipment first.

Using Batteries

6 pieces of AA (NO.5) or equivalent alkaline batteries must first be installed into the battery compartment.

- Open the battery compartment cover located on the bottom cabinet of the unit.
- Insert the batteries; carefully follow the polarity markings on the cabinet.
- Replace the compartment cover, making sure that it locks firmly in place.

Note:

- 1. Do not mix old and new batteries.
- 2. Always use same types of batteries.
- Always remove the batteries from the unit when it is not being used for an extended period of time.

Using Power Adapter

- Connect the AC/DC adaptor to the power supply jack of this instrument.
- **2.** Press the POWER SWITCH, the LCD screen is lit, which indicates the instrument has powered on.
- **3.** If you are ready to turn off the instrument, press the POWER SWITCH again.

Note:

- In the idle mode, the instrument will automatically shutdown in 30 minutes if you do not take any action on the instrument (Please refer to "Auto Power Off" for details).
- 2. When the keyboard is not in use or during thunderstorm, please disconnect the power for safety purpose.

Setting a Music Stand

A music stand is supplied with the keyboard. You can easily attach it to the instrument by inserting it into the slots at the rear of the panel.

Connections

Connecting a pair of Headphones

A standard pair of stereo headphones can be connected to the PHONES jack for private practice or late-night playing. The internal stereo speaker system is automatically shut off when a pair of head phones is plugged into this jack.

Note:

To avoid the risk of hearing loss when using headphones, please do not play the piano with a high volume level for a long time.

Using Sustain Pedal

Plug a function pedal into a sustain jack, you can select 4 pedal functions from the function menu setting: Sustain, Soft, switch to register memories and start/ stop a style. When using a sustain pedal in playing, your performance will remain an elegant sustain with hands out of keys, which makes the performance more expressive and abundant. (Refer to pedal function of Function Menu for details)

Chord Fingering

How the chords are played or indicated with your left hand (in the auto accompaniment section of the keyboard) is referred to as "fingering". There are 2 types of fingerings as described below.

Chord Basics

A chord, in music, is any harmonic set of three or more notes that is heard as if sounding simultaneously. The most frequently encountered chords are triads. A triad is a set of three notes that can be stacked in thirds. When stacked in thirds, the triad's members, from lowest pitched tone to highest, are called: the Root, the Third, and the Fifth.

Triad Type

There are following basic triad types:

Major Triad	A root with a major third added above and a perfect
	fifth will consist as a "Major Triad".
Minor Triad	A root with a minor third added above and a perfect
	fifth will consist as a "Minor Triad".
Augmented Triad	A root with a major third added above and an augmented fifth will consist as an "Augmented Triad".
Diminished Triad	A root with a minor third added above and a diminished fifth will consist as a "Diminished Triad".

Chord Inversion

We define this chord its root is not in the bass (i.e., is not the lowest note) as an inversion chord. When the root is in the bass, we call the chord: root-position chord. If we put the Third and Fifth in the root position, then it forms "Inversion", we call this chord "Inversion Chord". See the following major triad and its inverted chord.

Chord Name

The chord name contains two parts content: Chord root and Chord type.

Single Finger

Single finger type not only can detect single finger but also can detect multi finger. And the single finger makes it easily to play chords through only one, two or three keys. Including major, minor, seventh, and minor seventh chord. Refer to relevant picture on the right for details.

Multi Finger

Multi finger type only can recognize those chords have listed in the chord list, and also can be found in the dictionary function.

Note:

In full range mode, the entire keyboard will only recognize chords played in normal fingering.

Augmented Triad Diminished Triad

Root Position First Inversion Second Inversion

Tempo

Each style of the instrument has been set with a default or standard tempo; however, this can be changed by using the [TEMPO +]/ [TEMPO -] button.

- 1. Use the [TEMPO +]/ [TEMPO -] button to change the tempo. While the tempo data is flashing, use the data dial can also change the tempo.

Pedal Function

Using pedal function can makes your performance more naturally and with greater expressiveness.

Multi-function Pedal

You can refer to Pedal Type chapter for details.

1. Sustain Pedal

This pedal function performs the same function as the damper pedal on an acoustic piano, letting you sustain the sound of voices even after releasing the keys.

Step and press on the pedal to turn the sustain effect on. Release the pedal to turn the sustain effect on.

2. Soft Pedal

When the soft pedal is selected, pressing this pedal and makes them (the notes you play) sound softer.

3. Save Pedal

When the save pedal is selected, pressing this pedal at the first time to call up register memory: M1, and then you can call up register memory M2, M3...by pressing this pedal step by step (There are 32 memories).

Note:

When you pressing this pedal and change memory number, the pedal function setting of register memory will be overlapped or ignored.

4. Style Start/Stop Pedal

When the style start/stop pedal is selected, pressing this pedal to start/stop accompaniment.

With the MIDI functions you can expand your musical possibilities. This section will let you know what MIDI is, and what it can do, as well as how you can use MIDI on your instrument.

What's MIDI?

- 1. MIDI (short for Musical Instrument Digital Interface) allows a wide variety of electronic musical instruments, computers and other related devices to connect and communicate with one another. MIDI carries event messages that specify notation, pitch and velocity, control signals for parameters such as volume, vibrato, audio panning, and program change information to change the voice selections.
- The instrument can output the real-time playback information via MIDI and control external MIDI devices. The instrument can also accept incoming MIDI messages and generate sound accordingly.

Note:

This instrument has a USB(DEVICE) terminal, which can be connected to a PC as an MIDI input or MIDI output. This can not be connected with another instrument, unless other USB host device with an USB terminal.

The main application of midi

1. Used as a tone generator

This instrument can receive MIDI data from computer, and execute MIDI controls to change channels, change voices, add effect and make sound and so on. Refer to MIDI Implementation Chart for more MIDI controls.

2. Used as a MIDI Keyboard

This instrument will send MIDI data to your computer and these MIDI data are record, when you play keys, change voice and turn DSP on/off. If you play keys with accompaniment, the computer can only record your performance only. You can also edit all records, such as change channels, change voices and add DSP effects and so on, on your computer. And then you can play back them by other sound source (for example the sound card of computer). It is available to play with the instrument while playing back records. Refer to MIDI Implementation Chart for more MIDI controls.

3. Select a MIDI Device

For normally using the USB terminal, you need to do some settings in application software; we introduce the Cakewalk Pro Audio MIDI software under WINDOWS XP operating system as an example.

Open the Cakewalk Pro Audio MIDI software; you will see the dialog box below.

Press the left button of dialog box to continue:

Select MIDI Input terminal on the left of dialog box, and MIDI Output terminal on the right, the USB AUDIO DEVICE can be used as MIDI USB input and output terminals, select it and press "OK" button to enter software, you can use MIDI USB terminal now. You can also select MIDI device from TOOLS

MIDI DEVICES menu of Cakewalk, the way of choosing MIDI device from other related MIDI software is similar.

Troubleshooting

Problem	Possible Cause and Solution
The speakers produce a pop sound whenever the power is turned ON or OFF.	This is normal and is no cause for alarm.
No sound when the keyboard is played.	The R1/R2/L voice volume (Mixer) settings could be set too low. Make sure the voice volumes are set at appropriate levels.
When using a mobile phone, noise is produced.	Using a mobile phone in close proximity to the instrument may produce interference. To prevent this, turn off the mobile phone or use it further away from the instrument.
The auto accompaniment does not play back even Sync is in standby condition and a key is pressed.	You may be trying to start accompaniment by playing a key in the right-hand range of the keyboard. To start the accompaniment with Sync Start, make sure to play a key in the left-hand range of the keyboard.
Certain notes sound at wrong pitch.	Make sure that the tuning value is set to 0. Press and hold the [+/YES] and [-/NO] buttons at the same time, then turning the power on will set INSTRUMENT to default.
The Harmony function does not operate.	And Harmony cannot be turned on when a drum kit is selected for the voice R1.

Notice:

If you notice any abnormality cannot handle, please connect the provider or specified repair station, and have the instrument inspected by qualified service personnel.
